in the top spot for Document
Management & Imaging – KLAS*

ONC Certified HIT
Meaningful Use certified

85%
of all innovations
are customer-driven

>96%
customer retention
year after year

Drawing on the knowledge of the credentialed, experienced staff and clinicians at our more than 1,800 lifetime healthcare customers, Hyland, creator of OnBase, is dedicated to helping healthcare systems deliver superior patient care. That's why we partner with Allscripts, combining healthcare industry experience and proven technology to produce effective business solutions for our mutual customers.

Optimize your EMR with ECM

The OnBase Integration for Allscripts extends the value of your technology investments by utilizing the increased functionality of enterprise content management (ECM) to streamline processes across your entire organization. Deploying the OnBase Integration for Allscripts allows you to:

- **Manage your content.** OnBase securely captures, stores and manages your content at the patient, order and encounter levels for improved accuracy and reduced risk of lost or misplaced information.
- **Create one complete patient record.** With OnBase, clinicians and staff access all non-EMR based content from within Allscripts – making it the single source of patient information. This way, more time is spent acting on information, rather than looking for it.
- **Deliver the right information to the right people at the right time.** OnBase provides authorized users instant access to information when, where and how they need it to facilitate more informed decision-making.
- **Automate deficiency tracking, referrals management, release of information and more.** Business process tools streamline routine tasks, efficiently supporting health information management and increasing productivity.
- **Expand OnBase functionality beyond the Allscripts platform.** Integrating OnBase with ancillary systems (CACs, diagnostic solutions, ERP solutions, VNA checklists, etc.) optimizes them and removes "information silos" across the organization, providing an even greater return on investment.

ECM is more than technology. It's a strategy for your entire organization. For more information about the OnBase Integration for Allscripts, visit OnBase.com/Allscripts »

One platform **Unlimited potential**
