

OnBase Accelerators for Guidewire InsuranceSuite

Accelerate your success with OnBase for Guidewire

Speeds integration with Guidewire

Increases speed and accuracy

Automates processes

Working together, OnBase and Guidewire help claims, underwriting and billing professionals get their work done more efficiently and effectively. By decreasing your dependency on paper, you reduce manual errors, promote secure file sharing and deliver content in context. And with OnBase, you minimize organizational, technical and financial risks by quickly integrating your Guidewire system with the only enterprise content management (ECM) solution in the Guidewire PartnerConnect Solution program.

Product accelerators:
Pre-built integration code and configurations

Implementation accelerators:
Proven implementation methodology aligned and approved by Guidewire

Upgrade accelerators:
Ongoing improvement

Support accelerators:
Maximizing the value of your Guidewire investment

“We want to get out of the business of difficult integration work and focus on our core business. With Hyland, the depth of integration points will be appreciated by our business users.”

– Phil McCain, VP of IT, Frankenmuth

Product accelerators: Pre-built integration code and configurations

OnBase Solution Accelerators for Guidewire InsuranceSuite™ make it unnecessary to re-invent the wheel for each client engagement, helping P&C customers reduce the time, costs and risks associated with incorporating ECM capabilities as part of their Guidewire core transformation initiatives. With true point-and-click configuration that minimizes the need for custom coding, OnBase Solution Accelerators reduce your time-to-market for new products or services, decrease capture and document management implementation time and costs by 50 percent or more and improve project team performance.

More than software alone, OnBase Solution Accelerators represent a package of Guidewire-tested and approved software capabilities, Hyland professional services and ongoing customer support. They feature a selection of OnBase ECM and event-driven middleware capabilities that Hyland has pre-configured to address common use-case scenarios derived from real-world implementations. You can use these configurable component capabilities as-is for a solution to a particular problem, or extend as needed for a customized solution. They have been reviewed by Guidewire to assure adherence to software design principles and quality criteria, and have been fully tested by both Hyland and Guidewire to confirm they effectively integrate with each OnBase and Guidewire release.

Implementation accelerators: Proven implementation methodology aligned & approved by Guidewire

Instead of starting the discovery process from scratch, Hyland begins a Guidewire integration implementation project half-way done. Hyland’s Guidewire-trained insurance services team utilizes the same Agile methodology used by Guidewire’s certified implementation partners. The experienced team of project managers, solution architects

and installation professionals have integrated OnBase with more than 30 Guidewire Centers at more than 20 unique organizations. These opportunities have given them the ability to develop an in-depth knowledge of the challenges faced by P&C carriers replacing their legacy systems.

Upgrade accelerators: Ongoing improvement

Replacing core systems is a complex process that often requires several years to complete. Hyland provides dedicated, Guidewire-certified product development, quality assurance and technical support resources to ensure the ongoing improvement, functional integrity and upgradeability of Solution Accelerators for the duration of your core replacement initiative and beyond. Hyland charges no additional fees for enhancements to Solution Accelerator product components nor are there any additional costs for regression testing of Accelerators against new versions of Guidewire.

Support accelerators: Maximizing the value of your Guidewire investment

Offering deep Guidewire-specific knowledge and experience, Hyland’s dedicated technical support team for Guidewire customers ensures a smooth transition from testing user acceptance to taking the solution live and into day-to-day operation.

With OnBase, you get an ECM solution that’s Ready for Guidewire verified and ready to go. Purpose-built accelerators for the full Guidewire InsuranceSuite™ empower you to speed your integration and implementation by up to six months. Now that’s acceleration.
