Opening the Door to Connected Healthcare

About Hyland

Hyland Healthcare offers a full suite of content services and enterprise imaging tools, bringing documents, medical images and other clinically rich data to the healthcare stakeholders that need it most. This comprehensive view of patient information accelerates decision-making and improves patient outcomes.

Hyland Healthcare provides connected healthcare solutions that harness unstructured content at all corners of the enterprise and link it to core clinical and business applications such as electronic medical records (EMR) and enterprise resource planning (ERP) systems.

HIMSS Market Insights research report: 2022 State of Interoperability and Connected Care. This survey was conducted among 117 qualified business processes, streamlines clinical workflows and improves clinical decision making.

Hyland Healthcare is committed to helping healthcare organizations realize the potential of connected care. Our solutions help healthcare leaders overcome the challenges of integrating data from multiple systems and devices, ensuring that patient information is available to those who need it most.

Consideration of low-code development platforms has grown

51% of providers with on-site, off-site and virtual care teams are considering low-code development platforms, up to 30% of the time.

Versus the percentage using these digital sharing options up to 25% of the time...
