

# HYLAND CONTENT PORTAL FOR HIGHER EDUCATION

## Enhance efficiencies, student engagement and return on investment

In the wake of the current global healthcare situation, the world has become digital-first and increasingly virtual. Sending paper-based applications and forms via the mail, going in-person to campus offices or emailing PDF forms slows processing and creates inefficiencies. There is ongoing potential for faculty, staff and students to be located off-campus, so the need to deliver digital services has never been more important to keep key operations moving.

Hyland's partnership with Jadu provides an integrated portal solution for delivering exceptional digital services — allowing students and families to self-service from any location on their mobile, tablet or desktop devices. With a modern, public-facing portal experience, the Hyland Content Portal for Higher Education connects to our content services

platform to provide online forms, document upload and tracking, payment processing and workflow. This helps your school deliver new and improved online services to end-users while enhancing engagement.

Students benefit from multiple use cases, including admissions and financial aid applications, academic records requests and more. Students can easily interact online with your institution to access or submit documents whenever or from wherever they need to, reducing manual processes and increasing efficiencies while extending the value of your existing technology investments.

### HIGHLIGHTS:

- Enables online processes at the front-end to reduce calls and wait times
- Allows end-users to self-service from any location on mobile, tablet or desktop devices
- Provides 24/7 access to information stored in Hyland's content services platform
- Provides fully responsive portal forms that meet accessibility standards
- Integrates directly into existing public portals and web sites

### USE CASES:

- Admissions applications and forms
- Financial aid applications, forms and awards information
- Transcript and academic records requests
- Vendor/supplier portal and accounts payable
- Internal staff including IT and HR

### IMPACT:

- Reduces manual processes and increase efficiencies by decreasing paper-based approaches and time-consuming searches for information
- Enhances student engagement and satisfaction with a digital channel to easily submit documents, complete online forms and check workflow status from any web browser
- Extends the value of existing technology investments with easy-to-use web form creation and management to drive digital transformation initiatives
