- Mental Health
- Hospital Charity
- Medical Records and Information Governance
- Quality Management
- Pathology
- Human Resources
- Clinical Care
- Obstetrics and Gynaecology
- Community Care
- Accounts Payable
- Admitting and Patient Registration

Accounts Payable
Integrate OnBase with your accounting solution to improve information access, automate processes and eliminate compliance risk — all while extending the value of your existing systems.

Admitting and Patient Registration
Eliminate paper, filing, copying and storage costs. Securely capture accurate and more complete patient information faster, support compliance and create a better patient registration experience.

Auditing
Manage the appeal process for external auditors and denial of claims for audits — Care Quality Commission, Monitor or others — with a full document trail and sophisticated tracking features.

Clinical Care
Create a more complete patient record — with clinical images, photos, videos and reports — for an exceptional provider experience and superior patient care.

Community Care
Empower community health professionals to complete documentation and capture associated wound or environmental photos while in the field for better data, increased collaboration and reduced travel time.

Endoscopy
Clinicians quickly and easily build detailed reports with embedded images imported from any endoscope that may be accessed in context through the electronic patient record (EPR) and forwarded to referring physicians.

Facilities Management
From scan-store-access to full lifecycle management, use a single platform to measure and manage facility business processes.

Hospital Charity
Streamline and provide a comprehensive view of gift processing. Reduce the time spent managing agreements to speed delivery of funding while lowering the cost per pound raised.

Human Resources
Decrease the effort and expense of storing and retrieving employee files and increase security and compliance while elevating your service levels.

Imaging
- Cardiology
- Dermatology
- Ophthalmology
- Radiology
- Radiation Oncology
- Ultrasound

Improve clinical image access and collaboration by extending DICOM and non-DICOM content throughout the enterprise with Acuo VNA, NilRead Enterprise Viewing and PACSgear image connectivity solutions.

Legal
Automate rules-based approval, routing and escalation tasks to quickly create and securely manage contracts, accelerating reviews and approvals and supporting vendor relationships.

Medical Records and Information Governance
Allow clinicians and staff access to the content they need from within your EPR to support collaboration, simplify chart completion and minimise manual data entry while helping you meet compliance requirements.

Mental Health
Eliminate paper, increase collaboration and provide case management for better patient care while expediting reimbursements.

Obstetrics and Gynaecology
Capture images and biometry from any ultrasound machine, storing it (along with patient information) in a secure data repository to create complete, consistent reports and streamline daily workflow.

Pathology
Digitise pathology so clinicians can review slide images remotely, and clinicians and patients can experience faster, more accurate image diagnosis and treatment.

Quality Management
Strengthen quality programmes with tighter controls over policy and procedure updates, review and acknowledgement. Monitoring tools help you meet quality-control objectives and ensure that processes are completed consistently and on time.

Referral Management
With improved information access and process automation, OnBase streamlines referrals and improves collaboration for a better provider experience.

By presenting information within your organisation's existing IT solutions — like your EPR, enterprise resource planning (ERP) system, coding or financial software — OnBase healthcare solutions drive improvements in patient care and service.

A true enterprise solution, OnBase reduces operational costs while supporting better outcomes from the accident and emergency department to human resources.
