

APPEALS AND GRIEVANCES

Increase efficiency and ensure compliance through automation

Your members demand swift resolution to the appeals and grievances they file, and regulations require you to track, manage and document these cases in a timely, specified manner. Don't let manual, paper-based processes muddle your appeals and grievances workflows, opening you up to lengthy audits, corrective action and stiff fines.

Hyland Healthcare's Appeals and Grievances (A&G) solution is designed to manage all of your cases from beginning to end. With automated workflows that increase user and process efficiency, the software ensures your A&G activity is compliant and meets all deadlines.

Hyland Healthcare offers a powerful tool for all lines of business including commercial, Medicare and Medicaid.

CUSTOM MATRICES FOR PROCESS CONTROL

Hyland Healthcare offers a powerful tool for all lines of business including commercial, Medicare and Medicaid. Our software provides a customized matrix for each of these business lines that facilitates A&G review and management.

For commercial payers, our plan matrix helps simplify the management of multiple plans. With this tool, payers have the ability to configure activities based on a specific plan's needs — they can review rules per plan, SLAs, as well as mandatory and voluntary actions. The plan matrix makes it easy for users to see and report on all case data and analyze performance metrics associated to individual plans.

For Medicare, our A&G solution is designed based on the specifications outlined in the published guidance from the Centers for Medicare and Medicaid Services (CMS). The tool ensures all data is captured and properly formatted, enabling universes to be generated at any time with the click of a mouse. With Hyland Healthcare, users can proactively manage the quality of their reports to ensure compliance with CMS requirements, timeliness of reports, and completeness and accuracy of data for audits.
