Siemens (Leonardo, & Siemens EDM/Soarian)
Spectrum
SSI Group (ClickON DMS)
Streamline Health (Access ANYware)
Streamline Health (FolderView)
TeamIA (iaFolder/iaJETScan)
TriMed (Emedsys)
Valco Data Systems

With evolving regulations and increasing reliance on IT to meet them, today's healthcare organizations need a document management solution that is secure, flexible and reliable. That's why many hospitals are reevaluating and seriously considering a switch from their current solutions to Hyland Software's enterprise content management solution, OnBase.

Whether you're converting one solution or consolidating several onto OnBase, the conversion process is critical. With more than 100 conversions either completed or in-progress, we have the people, process, technology and experience to convert our customers' legacy document management systems into OnBase on time and on budget.

People

With the depth and breadth across our conversion team, you can be sure your project will stay on track with the right resources always readily available.

- Dedicated in-house conversion team of 18
- More than 50 years of collective conversion experience
- Highly specialized conversion skill sets and resources
- Experts on conversions, databases, storage – and OnBase
- Committed to the success of your OnBase solution – not just the conversion

Process

With our proven methodology, you can be sure your project won't have any costly mistakes or missing documents.

- Turnkey, highly collaborative and consultative approach—including services to link the converted documents to your EMR
- Sample conversion enables you to sign-off on the final solution before we begin the production conversion
- We account for 100% of the documents—both during and at the conclusion of the project—and we report on everything
- Coordinated conversion effort is synchronized with your OnBase design and implementation (one team)
- Our on-site off-line conversion approach ensures protected health information (PHI) rules are maintained

What Hyland's Converted in Healthcare

With our conversion experience across healthcare organizations, you can be sure we understand your specific project risks and requirements.

- 8 out of every 10 conversion projects in the last 12 months were for hospital systems
- 80+ healthcare-specific conversions for 40+ hospital systems (completed or in-progress)
- 25 hospital systems trusted Hyland to perform multi-system conversion projects

Technology

With our conversion tools, you can be sure your project will be completed with speed and accuracy.

- Internally-developed proprietary conversion software (Centralized Conversion Server)
- Product-agnostic conversion software that's not dependent on one-off utilities or APIs
- Built-in tools for real-time monitoring, chain-of-custody audit trail and recoverability
- Proven ability to scale—high-volume import processes of up to millions of documents/day
- Ability to lease hardware for temporary conversion staging environment
- Unlimited OnBase import licenses provided at no cost during the conversion

Experience

With the range of experience across our conversion team, you can be sure we're ready to meet your project requirements.

- 100+ conversions performed by our in-house conversion team (completed or in-progress)
- Experience converting more than 70 different document management products
- Billions of pages converted into OnBase by our in-house conversion team
- 500+ customers across the entire OnBase community have converted to OnBase

Converting to OnBase Delivers Proven Results

Align with Strategic Vision

Increase the adoption of your EMR. By having a single, consolidated ECM platform you put content at the fingertips of clinicians within the EMR.

Deliver Meaningful Business Value

- Reduce operational and administrative costs through consolidation of legacy systems
- Optimize IT resources by eliminating the need to support multiple legacy systems
- Enable IT to respond faster to changing business requirements and new projects
- Support adoption of other innovative, complementary technologies

Align with IT and Infrastructure and Reduce Risk

- Increase system scalability, reliability and performance
- Streamline conversion projects to meet tight 'go-live' deadlines
- Eliminate any conversion cost overruns through fixed bids (not time and materials)

Convert with Confidence to OnBase

Hyland is your partner throughout your conversion. We are passionate about your success and motivated to share what we know about delivering, operating and maintaining great solutions with you and your staff. Join the long list of customers who have already taken the step to convert to OnBase from their legacy systems, increasing their return on investment and consolidating on a platform that will serve their needs well into the future.
