DUCK CREEK TECHNOLOGIES + ONBASE:

5 REASONS TO INTEGRATE

Integrating Duck Creek with OnBase, Hyland's enterprise information platform, carriers unleash the full potential of their technology investments.

1 Be more productive in Duck Creek

With OnBase, users access critical undewriting, policy and claims documents without leaving their amiliar Duck Creek interaces. No more searching between systems. You process claims faster and make more inormed undewriting decisions.

2 Enjoy the full benefits of OnBase

It's more than just accessing documents. OnBase is Hyland's enterprise information platform, combining integrated document capture, enterprise content management (ECM), case management, intelligent automation, customer communications management and secure file sharing. OnBase extends and complements the value of the Duck Creek OnDemand platform.

3 Speed new product and process development

True codeless configuration provides non-technical line-of-business personnel the ability to design or change products to meet evolving needs, create workflows that improve process efficiencies and generate reports that provide new insight.

4 Improve security and compliance

By tracking revision histories, managing retention periods and providing controlled access to all critical documents, OnBase keeps your information secure.

With automated document retention and audit trails that detail who did what, when and why, you proactively deal with compliance issues and make audits stress free.

5 Tap expert advice

You're not just combining two powerful solutions, you're tapping into the expertise of a unified team with decades of experience helping insurers succeed around the globe. From consulting and services engagements to flexible deployment options, Duck Creek and OnBase are here to make sure your organization has easy access to the information it needs to succeed.
