Drawing on the knowledge of the credentialed, experienced staff and clinicians at our more than 2,000 lifetime healthcare customers, Hyland Healthcare is dedicated to helping customers deliver superior patient care. That's why we collaborate with Epic, combining healthcare industry experience and proven technology to produce effective business solutions for our mutual customers.

Our modular, comprehensive approach empowers Epic organisations to securely capture, manage, view and share vital information.  This strategic approach to healthcare content services paired with its suite of industry-leading enterprise content and medical imaging management solutions helps Hyland Healthcare solve the information challenges facing today's healthcare organisations.

## Discover and explore what our solutions can do for Epic organisations

### Optimise Epic with OnBase enterprise content management

The OnBase Integration for Epic extends the value of your IT investments to deliver all relevant patient information within the context of Epic and streamline processes across your entire organisation.

Deploying the OnBase Integration for Epic allows you to:

· Securely capture, store and manage your content in its native format for improved accuracy and reduced risk of lost or misplaced information.

· Create complete, patient–centric records. Clinicians and staff access all non-EPR based content – such as wound and dermatology, photos, ECGs, pathology results and clinical images – from within Epic.

· Deliver the right information to the right people at the right time for more informed decision-making when, where and how they need it.

· Automate deficiency tracking, referrals management, release of information and your organisational checklists with business process tools

· Reduce IT sprawl with a simplified architecture by leveraging the flexible, low-code OnBase platform for with a lower total cost of ownership.

· Achieve a consolidated view of all patient-related content with the OnBase Patient Window.

## Acuo by Hyland vendor neutral archive

Acuo frees your organisation from proprietary archives for standards–based enterprise access to medical images – both DICOM and non-DICOM – regardless of viewing application to streamline clinical workflows.

- Increases control and cross-departmental access to images
- High performance archive supports on premise, in cloud and hybrid implementation options
- Highly scalable to support variety of organisational growth requirements, improved disaster recovery preparedness and enhanced migration
- Advanced image lifecycle management capabilities to support enterprise retention policies
- Integrates with OnBase as part of healthcare content services strategy

## PACSgear by Hyland image capture and connectivity

Our innovative and widely adopted PACSgear connectivity technologies enable you to capture, access and distribute medical images, data, film, video, visible light and other media across any department.

- Simplifies the capture of images, video and other clinical content
- Enables the sharing of images
- Integrates images to Epic and all major PACS and VNA applications

## NilRead enterprise viewer

NilRead offers clinicians a market-leading, zero-footprint viewer for DICOM and non-DICOM images.

- Enterprise reference and diagnostic viewing solution
- Innovative capabilities in image manipulation, collaboration and sharing
- Integration to the OnBase Patient Window provides access to clinical imaging content information through one reference point
