Hyland™

SAFE. SECURE. RELIABLE.

Depend on the Hyland Cloud

The Hyland Cloud, powered by Amazon Web Services (AWS), is the most reliable and secure cloud platform for your content services needs. Our custom-designed cloud architecture supports a range of Hyland solutions, empowering organizations to modernize with confidence and ease while driving agility and innovation at a global scale. With cloud infrastructure and security in the hands of Hyland and AWS experts, you're free to focus on delivering exceptional business results.

Practice makes perfect

Years of experience and billions of documents stored in the Hyland Cloud make for a mature and sophisticated solution platform.
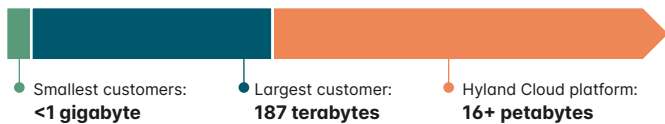

19+ YEARS

9 BILLION documents and counting

Hyland Cloud users

7.7 MILLION and growing!

100 million+ logins each month

Scalable for business growth

Smallest customers: **<1 gigabyte**

Largest customer: **187 terabytes**

Hyland Cloud platform: **16+ petabytes**

Hyland Cloud certifications

Your content is your content — no one else's. It resides in data centers that meet or exceed required security standards, so only you can access it.*

Data centers
- SOC 2 and 3 audited
- ISO 27001 certified (or local equivalent)
- TIA Tier 3 or 4 (or equivalent)

Hyland Cloud Platform Engineering team
- SOC 2 and 3 audited
- Cloud Security Alliance STAR registered
- ISO 27001
- PCI-DSS
- NIST 800-53
- Restricted physical access
- Rigorous internal reviews

Compliance

Hyland's rigorous security controls and governance oversight can help you meet your compliance requirements, including:
- HIPAA
- NIST
- GDPR
- PCI-DSS
- ISO
- FDIC
- FINRA
- GCIS
- And more

Hyland Cloud Platform Engineering team

Certified cloud experts in security, infrastructure, network, development, support, compliance, database services, operations and additional areas administer and maintain solutions for Hyland Cloud customers **24/7/365.**

CERTIFIED CLOUD EXPERTS

Individual encryption protects data in all states

All documents stored in the Hyland Cloud are encrypted using a unique 256-bit AES encryption key. Data is protected while in use, in transit and at rest — and is kept separate from other organizations' content at all times.

Data availability

Reliable, accredited data centers provide the highest levels of availability and uptime.

The Hyland Cloud has industry-leading recovery point objective (RPO) and recovery time objective (RTO) commitments.

24/7/365

99.99% uptime

Limitless industry and solution possibilities

The Hyland Cloud accommodates organizations with even the toughest regulations and most stringent SLA requirements.

| Healthcare | Financial services | Government | Insurance | Higher education | Commercial |

All of Hyland's platforms — Alfresco PaaS, Nuxeo Platform, OnBase and Perceptive Content — run optimally in the Hyland Cloud.

Access your information however you want

Hyland Cloud provides users with flexible access to their documents and workflows anytime, anywhere.

Access points

Desktop browser

Mobile device

Average number of documents ingested across customer base

PER DAY	PER MONTH	PER YEAR
49 million	1.5 billion	18 billion

Users around the globe meet unique requirements

Your data is stored in-region to reduce latency and aid in meeting compliance requirements. Hyland Cloud accommodates organizations globally.
