

MEDPOWER TRAINING FOR ONBASE

An OnBase EMR integration is the best way to empower providers with quick and easy access to the unstructured patient information they need to deliver superior care. However, to unlock the true potential of this complete EMR solution, you need a comprehensive training solution that makes it easy for physicians and nurses to master all aspects of the platform. MedPower's mobile microlearning system makes it easy for providers to learn OnBase while saving you time and money.

MEDPOWER MAKES ONBASE TRAINING EASY

- **The latest training techniques to improve retention.** MedPower microlearning videos and training are an engaging and effective way to learn OnBase.
- **Complete courses on your own schedule.** Providers can complete courses from anywhere, using a PC, tablet or smartphone.
- **Courses can be customized by department.** Coursework can be tailored by department, so there's no need for providers to sit through what doesn't apply to them.
- **Rewards to keep providers engaged.** Track progress and reward providers with points, badges or awards.

MEDPOWER SAVES TIME AND MONEY

- **Pre-produced courses get you up and running quickly.** MedPower partners with Hyland to ensure you always have the most up-to-date training.
- **Reduce or eliminate classroom training.** Online training saves you time and money, while providing a safer alternative to crowded classrooms.
- **MedPower can create custom content in as little as 48 hours.** No need to secure additional resources to build time-consuming training to support your custom workflows.
- **Reduce physician burnout and increase productivity.** Track learner progress and measure return on investment with MedPower's advanced reporting and analytics.

Pairing OnBase with MedPower's microlearning system and advanced analytics gives your team the tools you need to more effectively onboard and up-skill your EMR users.
