

HYLAND HEALTHCARE

# TAKE A TOUR OF THE CONNECTED POST-ACUTE CARE PROVIDER

### Accounts Payable

Integrate the OnBase enterprise information platform with your accounting solution to improve information access, automate processes and eliminate compliance risk — all while extending the value of your existing systems.

### Admitting/Patient Registration

Streamline referral processing, eliminate paper filing, copying and storage costs. Securely capture accurate and more complete patient information, including electronic signatures, support compliance and create a better patient registration experience.

### Auditing

Manage appeal processes and denial of claims audits — for external auditors, like Medicaid or Medicare — and provide a full document trail with sophisticated tracking features.

### Clinical Care

Create a more complete patient record, with clinical images, photos, videos and reports — without users toggling between clinical and therapy EMRs or records — for an exceptional provider experience and superior patient care.

### Facilities Management

From scan-store-access to full lifecycle management, use a single platform to measure and manage your facilities business processes.

### Health Information Management

Allow clinicians and staff access to the content they need from within your EMR to support collaboration, simplify chart completion and minimize manual data entry while helping you meet compliance requirements.

### Home Healthcare

Support your mobile staff by providing anytime, anywhere access to a comprehensive view of patient information. Streamline home health processes to more efficiently manage volume, adapt to regulatory changes and improve care coordination.

### Human Resources

Decrease the effort and expense of storing and retrieving employee files, and increase security and compliance while elevating your service levels.

### Legal

Automate rules-based approval, routing and escalation tasks to quickly create and securely manage contracts, accelerating reviews and approvals, and supporting vendor relationships.

### Patient Accounting

Increase productivity and accountability by centralizing payment posting tasks across multiple billing systems. Automate routing and denials management with drill-down data analytics, scorecards, pivot charts and executive dashboards for increased visibility.

### Physician Consults

With improved information access and process automation, OnBase streamlines care management and improves collaboration for a better provider experience.

### Quality Management

Strengthen quality programs with tighter controls over policy and procedure updates, review and acknowledgement. Monitoring tools help you meet quality control objectives and ensure consistent processes complete on time.

### Utilization Management

Ensure authorizations are in place. Track all documentation with up-to-the-minute process insight. Streamline the ADR process.

By presenting information within your organization's existing IT solutions — like your EMR, ERP, coding or billing software — OnBase healthcare solutions drive improvements in patient care and service. A true enterprise solution, OnBase reduces operational costs while supporting better outcomes from the ER to HR.
