Hyland Cloud

SAFE AND SECURE IN THE HYLAND CLOUD

Hyland Cloud

The Hyland Cloud is a secure, privately-managed, multi-instance cloud that is custom designed to act as a hosting architecture for Hyland's enterprise content management (ECM) solution, OnBase. It provides a safe, secure and reliable deployment option to save money, free up time for staff and remove the burden of in-house data maintenance and protected storage.

OnBase Hosted in the Hyland Cloud

The full functionality of the OnBase solution is available in the Hyland Cloud. OnBase is designed to coordinate the content, processes and business cases that keep organizations running. The platform manages mission-critical data, proprietary documents and public-facing information and seamlessly integrates with other systems across an organization, both legacy and future-facing.

KEEP YOUR CONTENT ON LOCKDOWN

Your content is your content—no one else's. It resides in data centers that meet or exceed required security standards, so only you can access it.

THE HYLAND CLOUD CERTIFICATIONS

Data Centers

SOC 1 and 3 or 2 audited   ISO 27001:2013 certified   CSA STAR Registrant

Hyland Cloud Services

13+

4.3 Billion
documents and counting

HYLAND CLOUD SERVICES

More than 60 certified cloud experts provide dedicated data center support for Hyland Cloud customers 24 hours a day, seven days a week, 365 days a year.

60+

INDIVIDUAL ENCRYPTION ELIMINATES DATA CO-MINGLING

All documents stored in the Hyland Cloud are encrypted using a unique 256-bit AES encryption key. Data is protected while in use, in transit and at rest — and is kept separate from other organizations' content at all times.

DATA DEPENDABLY AVAILABLE

Reliable, accredited data centers provide the highest levels of availability and uptime.
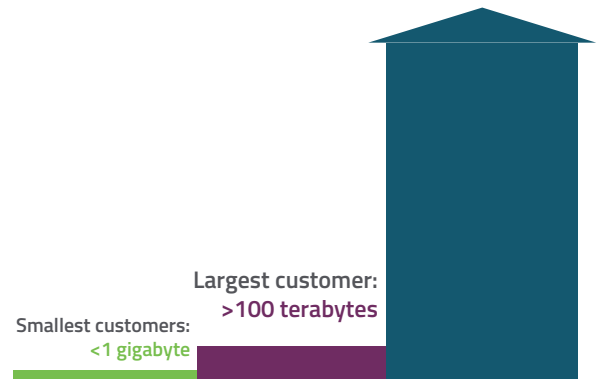

24/7/365

TIA Tier 4:
99.99% uptime

SCALABLE FOR BUSINESS GROWTH

As businesses evolve, their storage needs often grow. Small business to enterprise storage requirements are accommodated in the Hyland Cloud.

All Hyland Cloud customers:
2 petabytes

Largest customer:
>100 terabytes
