

## ShareBase in the Hyland Cloud

# SHAREBASE BY HYLAND: SAFE AND SECURE IN THE HYLAND CLOUD

ShareBase by Hyland is an enterprise cloud-based sharing product that provides secure, cloud-based content storage and collaboration while ensuring your organization retains ownership and control.

ShareBase is deployed in the Hyland Cloud: a secure, privately-managed cloud that is custom designed to serve as a hosting architecture for Hyland's cloud offerings. The Hyland Cloud was first deployed more than 10 years ago for Hyland's enterprise information platform OnBase. Since then, Hyland has continued to pioneer innovative cloud-based solutions, including ShareBase.

## HYLAND CLOUD CERTIFICATIONS

Your content is your content—no one else's. It resides in data centers that meet or exceed required security standards, so only you can access it.

### Data Centers

- SOC 1 and 3 or 2 audited
- ISO 27001 certified (or local equivalent)
- TIA Tier 3 or 4 (or equivalent)

### Hyland Cloud Services

- SOC 2 and 3 audited
- Cloud Security Alliance
- Restricted physical access
- Rigorous internal reviews
- CSA STAR Registrant

### Compliance

The Hyland Cloud can help you meet your compliance objectives, including regulations like:

- HIPAA
- NIST
- GDPR

## PRACTICE MAKES PERFECT

Years of experience and billions of documents stored in the Hyland Cloud make for a mature and sophisticated solution platform.

**NINE BILLION**

documents and counting

## HYLAND CLOUD SERVICES

More than 100 certified cloud experts provide dedicated data center support for Hyland Cloud customers 24 hours a day, seven days a week, 365 days a year.

**100+**   
CERTIFIED CLOUD EXPERTS

## INDIVIDUAL ENCRYPTION PROTECTS DATA IN ALL STATES

All documents stored in the Hyland Cloud are encrypted using a unique 256-bit AES encryption key. Data is protected while in use, in transit and at rest — and is kept separate from other organizations' content at all times.

## HYLAND CLOUD USERS
