

EXECUTIVE BRIEF

SHAREBASE BY HYLAND

Automate sharing. Empower users. Retain control.

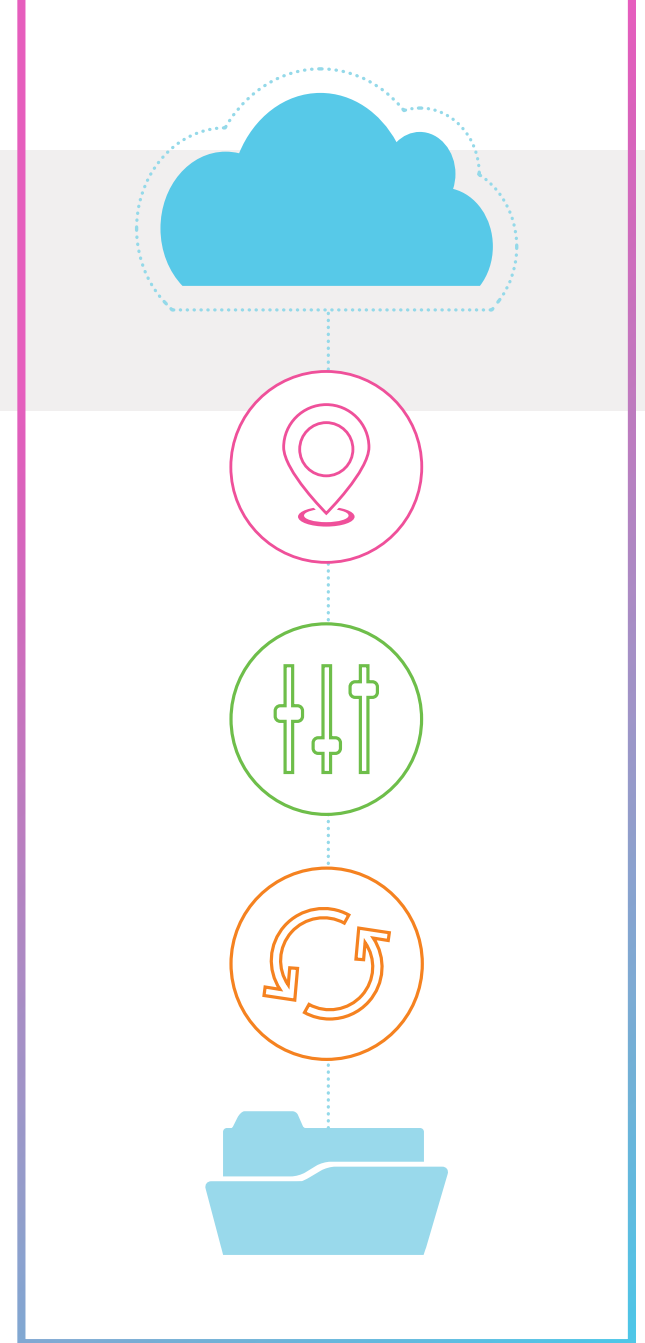

With ShareBase by Hyland, empower users with a robust Content Collaboration Platform (CCP) that allows them to retain control over information shared outside your organization.

HIGHLIGHTS

- Utilizes our purpose-built cloud, not public shared clouds
- Controls usage with corporate email addresses, not personal accounts
- Interacts with your existing OnBase solution

IMPACT

- Hosts your data in a cloud designed for content management. Your information is never co-mingled with another company and you will know exactly where it is located.
- Ensures your organization retains control of all shared content. Revokes access and allows easy transfer of ownership as users leave or change roles.
- Enables automated document sharing as part of your business processes. This reduces bottlenecks caused by the manual copying and pasting of files into disconnected or unsanctioned sharing tools.
