HYLAND HEALTHCARE

See your *whole patient*

Create one view of patient information with connected healthcare solutions from Hyland

Today's hospitals and health systems run on information. Clinicians need it to make accurate diagnoses and improve patient outcomes. Finance needs it to secure and optimize reimbursement. HIM professionals need it to ensure compliance. And, Operations needs it to enhance performance and cut costs.

Unfortunately, much of the content needed to drive the healthcare business and improve patient care is painfully disjointed, locked away in proprietary systems outside of core clinical platforms such as EMRs, ERPs and PACS. In fact, while positioned to be a single source of health data, most patient information — nearly 80 percent — resides outside the EMR.

Hyland Healthcare provides the connected healthcare solutions that link the scattered unstructured information from all corners

of the enterprise to core systems — allowing you to see your whole patient and improve clinical decision making.

Hyland is the only vendor that brings content services and enterprise imaging solutions together, providing you with a single technology framework for all of your unstructured content needs. The OnBase enterprise information platform provides the foundation for all of our content services functions, allowing you to capture and manage clinical and business documents and link them to enterprise systems to streamline access and workflows.

Our enterprise imaging solutions provide everything you need to redefine PACS and take an enterprise-first approach to DICOM and non-DICOM images. From vendor neutral archiving to enterprise viewing, Hyland has you covered.

Hyland's connected healthcare solutions help address a wide variety of the industry's most pressing challenges and initiatives.

INTEGRATE POINT-OF-CARE IMAGES

Link encounter-based images to enterprise systems to eliminate clinical blind spots, improve change capture and streamline clinical workflows.

STREAMLINE ADMINISTRATIVE PROCESSES

Accelerate AP and AR processing, manage HR and legal documents, and automate records classification.

IMPROVE PATIENT EXPERIENCE

Reduce repetitive and annoying patient intake tasks by quickly capturing and sharing registration forms and integrating with patient portals.

ENHANCE CLINICAL COLLABORATION

Provide anytime, anywhere access and review of medical images across the enterprise, facilitating clinical collaboration and improving diagnostic interpretation.

ENSURE CONTINUITY OF CARE

Manage and exchange clinical content with both internal and external stakeholders throughout the continuum of care including member services, ambulatory, acute and post-acute caregivers.

OPTIMIZE YOUR EMR

Make your EMR a more comprehensive source of patient information, enhancing the value of the investment by allowing clinicians to access and review unstructured patient content and images in the context of the patient record.

ACHIEVE ENTERPRISE-FIRST IMAGING

Redefine PACS with VNA, universal viewing, image connectivity and intelligent workflow orchestration tools that allow you to share medical images throughout the enterprise and meet evolving imaging demands.

Brought together for better healthcare.

ENTERPRISE IMAGING

Acuo

The leading independent VNA (Vendor Neutral Archive) for enterprise access to all DICOM and non-DICOM medical images.

NilRead

Zero-footprint universal viewing platform that provides both referential viewing and advanced visualization.

PACSGear

A suite of image acquisition and connectivity tools that link medical images to enterprise systems.

ImageNext

Enterprise workflow orchestrator for medical imaging worklist optimization.

CONTENT SERVICES

OnBase

A complete suite of content services for all your clinical and administrative document and content management needs.

OneContent

A centralized content marketplace that helps optimize healthcare document completion and archiving.

Brainware

Intelligent capture and analytics to streamline and optimize key healthcare processes.
